## **POSTGRADUATE TAUGHT STUDENT HANDBOOK**

**MSc (FHEQ LEVEL 7)**

### **COMPUTATIONAL MECHANICS DEGREE PROGRAMME**

**SUBJECT SPECIFIC  
PART TWO OF TWO  
MODULE AND COURSE STRUCTURE  
2025-26**

## **DISCLAIMER**

The Faculty of Science and Engineering has made all reasonable efforts to ensure that the information contained within this publication is accurate and up-to-date when published but can accept no responsibility for any errors or omissions.

The Faculty of Science and Engineering reserves the right to revise, alter or discontinue degree programmes or modules and to amend regulations and procedures at any time, but every effort will be made to notify interested parties.

It should be noted that not every module listed in this handbook may be available every year, and changes may be made to the details of the modules. You are advised to contact the Faculty of Science and Engineering directly if you require further information.

## **IMPORTANT**

### **Term Dates**

The 25-26 academic year begins on 29 September 2025

Full term dates can be found [here](#)

### **Academic Integrity**

Swansea University and the Faculty of Science of Engineering takes any form of **academic misconduct** very seriously. In order to maintain academic integrity and ensure that the quality of an Award from Swansea University is not diminished, it is important to ensure that all students are judged on their ability. No student should have an unfair advantage over another as a result of academic misconduct - whether this is in the form of **Plagiarism**, **Collusion** or **Commissioning**.

It is important that you are aware of the **guidelines** governing Academic Misconduct within the University/Faculty of Science and Engineering and the possible implications. The Faculty of Science and Engineering will not take intent into consideration and in relation to an allegation of academic misconduct - there can be no defence that the offence was committed unintentionally or accidentally.

Please ensure that you read the University webpages covering the topic – procedural guidance [here](#) and further information [here](#). You should also read the Faculty Part One handbook fully, in particular the pages that concern Academic Misconduct/Academic Integrity.

### **The difference between compulsory and core modules**

**Compulsory modules** must be **pursued** by a student.

**Core modules** must not only be **pursued**, but also **passed** before a student can proceed to the next level of study or qualify for an award. Failures in core modules must be redeemed.

Further information can be found under “Modular Terminology” on the following link - <https://myuni.swansea.ac.uk/academic-life/academic-regulations/taught-guidance/essential-info-taught-students/your-programme-explained/>

### **Key Programme Staff**

<b>Civil Engineering Programme Director</b>	<b>Computational Mechanics Programme Director</b>
Dr Will Bennett	Professor Rubén Sevilla

## MSc (FHEQ Level 7) 2025-26

### MSc Computational Mechanics

YEAR 2 – Commencing at Swansea

Semester 1 Modules	Semester 2 Modules
<a href="#">EGIM07</a> Dynamics and Earthquake Analysis of Structures 10 Credits CORE	<a href="#">EG-M190</a> Social, environmental and economic context of research 10 Credits CORE
Research Project	
<a href="#">EG-M100</a> Case Study 20 Credits CORE	
<a href="#">EG-M101</a> 60 Credits Prof R Sevilla CORE	
Total 120 Credits	

#### Optional Modules

Choose exactly 20 credits

<a href="#">EG-M07</a>	Optimisation	TB2	CORE	10
<a href="#">EGIM08</a>	Plasticity in Structural and Geotechnical Engineering	TB2	CORE	10
<a href="#">EGEM07</a>	Fluid Structure Interaction	TB2	TB2	10
